*Excluding particulars relating to Bangalore City.

†Arrangements for cleaning latrines are made privately by landlords only. Municipality does not provide scavenger services. Night-soil is carried in baskets once in four days and dumped in place far away from the town.

*Water supply position is very inadequate at present. Water is being supplied on alternate days only, especially during the summer months and dry months, i.e. about 9 or 10 months a year. Capacity of the reservoir tank is 50,000 gallons, but it rarely gets filled up.

@Includes the City Corporation area and the area under administrative control of the City Improvement Trust Board.
